Personnel

People make businesses and organisations successful. Managing those people's information assists in achieving this success. Fitting then, that at the heart of each RemusPro® system is RemusPro® personnel.

RemusPro® personnel provides an effective way of managing all your personnel data. It allows you to store, update and view personnel information, with full auditing, in a secure environment based on company defined permissions. RemusPro® personnel keeps all of your information in one place. From copies of driving licenses to previous employer references, from blood type to bank account details - RemusPro® personnel stores the data centrally making it available for viewing and reporting when required.

Absence Management

Tracking holiday entitlement, managing holiday schedules and monitoring absenteeism are the three essential factors that make up RemusPro® absence management.

It is now possible to create absence entitlement policies that define the number of days holiday based on years service from any date. You can specify the amount of time that may be carried forward from one year to the next and even award entitlement credits for additional holidays. All absence management amendments must be approved and finalised for secure auditing.

Attendance

Increasing your company's productivity starts with one important factor - the improvement of your employee's time keeping. The right people in the right place at the right time will guarantee 'smooth running' with maximum efficiency - a goal that every company should strive to achieve.

RemusPro® attendance provides you with the tools to plan where your workforce should be and how long they should be working. It allows you to plan for each department within the company, selecting employees with the relevant tasks for the job in hand.

Job Costing

Monitoring costs on the shop floor have been made simpler with the introduction of RemusPro's® integrated job costing module.

Not only does RemusPro® allow costing by job, but it also gives you the flexibility of costing by department, individual employee and specific operation. By using the performance comparison reports, you can check on the effectiveness of your employees and highlight areas for improvement.

Fire Alarm / Roll Call

Did you know that your fire monitoring system can be connected directly to RemusPro® to produce an accurate roll-call report in the event of an emergency?

An increasing number of safety-conscious businesses have introduced this simple feature to ensure the health and safety of their employees.

Reports

Implementing a sophisticated workforce management system will undoubtedly improve the efficiency of any business, but the addition of a flexible reporting module will enable the information generated by the system to be shared with a wider audience.

The RemusPro® report module provides over 160 clear and concise, and user editable, reports, forms and graphs as standard.

Personal Information Portal (PIP) overview

As the workplace becomes increasingly diverse, it is not always practical for employees to 'clock-in' at a conventional attendance terminal.

For the employee, the RemusPro® PIP provides the ideal solution, offering the facility to book-in, request time-off and to check remaining holiday entitlements. For the supervisor, the RemusPro® PIP enables instant access to employee attendance and absence information whilst allowing authorisation of various requests - all this from home, from the train or even from their iPad!
